

# Diamond Mine Token

“The first virtual Mining platform / From pollution to electricity bills and MetaverseFee(™)\*”

- 3d metaverse deployment concept 1

# Lite

A community-driven token, the first of its kind. The only token in the crypto ecosystem that generates passive income by sharing revenue from transaction fees and green mining facilities with holders.

## About Diamond Mine Token

With the launch of Green mining facilities, we're closer to the moon than ever before. Colonizing abandoned hydro-electric plants is just a matter of time. But before we reach out there, we need to be heard and give a green voice to crypto mining.

- Cryptocurrency is the future of money, but right now it is linked to excessive use of energy, so generating green sustainable energy is the biggest challenge facing humanity.
- We're committed to developing green crypto mining solutions and investing in the advancement of blockchain technology in order to make it better for the planet.

# Diamond Mine Token Foundation

The vision of Diamond Mine Token Foundation is to solve the renewable energy problem by harvesting it from renewable sources.

DiamondMineToken Foundation will host annual open-calls where every individual, group, NGO or virtual business in the metaverse can apply with their own innovative energy projects that are in line with our vision.

The submitted projects will be presented to the community and undergo a voting process where our holders get to pick the projects they consider worth funding.

## What We Provide

### Secure Currency

Liquidity will be locked for 1 year.

### Expert Team

The team is well experienced in mining and web development.

### Easy Trade

Easily trade on PancakeSwap and other upcoming exchanges.

## **Block Chain**

We are starting on the Binance Smart Chain (BSC), then expanding to the Ethereum and Solana blockchains, later followed by the possible expansion to ADA blockchain.

## **Exchange**

We expect to be listed on big exchanges soon, so our users will get to pick their preferred place of exchange to purchase the tokens.

## **Mining**

The coins will be mined with our users' best interest in mind. We expect another future endeavor of the project to be renting mining facilities and using the income to buyback and burn.

# **SERVICES**

The metaverse workplace will provide new life changing opportunities in a completely new universe.

# RoadMap

## See our Crypto Journey

- Phase 1
  - Deploying smart contract
  - Presale
  - Launch
  - 1k Holders
  - 5K Telegram Members
- Phase 2
  - CMC & CG Listing
  - Top Exchanges Listing
  - First mining income to buy tokens & burn
  - Certik Audit
  - 10k TG Members & 5k Holders
- Phase 3
  - 15k Telegram Members
  - 20k Holders
  - Big Marketing Push(Famous Influencers)
  - Farming platform
  - Dapp with staking pools
- Phase 4
  - 50k Holders
  - ETH Bridge
  - V2 Website Launch
  - Launchpad
  - More Utility
- Phase 5
  - To Be Announced

# DiamondMineToken Wallet

DiamondMineToken Wallet is coming soon. Simplify your transactions by saving your regular contacts within the DiamondMineToken wallet. Before a transaction is complete, you get 2 seconds to double-check the data and verify your payment. The built-in currency conversions will make payments across the FIAT/CRYPTO/PAYPAL/MASTERCARD world even easier.

## Hydro-Solar-Mining Farm

Hydro-Solar Mining Farms is the first concept currently in development, a project that will be presented in more detail by next year and discussed with our community. We will present the project's ecosystem and background data used for calculations in the API of the metaverse integration in the form of a mathematical documentary.

## From pollution to electricity bills and MetaverseFee(™)\*

The idea behind the farm is to build mining farms that are not only self-sustainable, but also generate surplus energy which will then be distributed to the power grid. The project is likely to set a precedent for the future of sustainable mining.
